

id	source	résumé
17	TRUSTLY	Add information about the type of a given transaction
42	STET	Management of a remittance Structured type information
44	ISABEL	Addition of counterparty information when returning transactions to an AISP
100	BPCE	Implementation of openId Connect 1.0 Offline access
213	BudgetInsight	Adding exchange rate information for transactions related to international payments (AISP)
219	SG	Add an equivalent amount for international payments
227	BGL	Adding a batchBooking Indicator
242	BNPP	Allow the PISP to explain it accepts a possible change of the debtor account
243	BNPP	Allow the PISP to explain it accepts a possible change of charge handling
244	BNPP	Adding information in order to handle the PSU language preferences
253	Budget Insight	Adding fee information on transactions returned to an AISP
258	STET	Add an optional InstructionForCreditorAgent structure for international payments
263	GTM	Add an optional UltimateDebtor structure for international payments
264	GTM	Add an optional ExchangeRateInformation structure for initiating an international payment (PISP)
266	GTM	Move the Purpose structure at instruction level
267	GTM	Modify the Address structure for international payments
268	GTM	Allow the setting of date of birth and city of birth for the beneficiary identification for international payments
269	GTM	Allow the specification of an intermediary agent for international payments
270	BNPP	Handling of deprecated entry points
271	STET	Fixing Security impact of Client Credential Token for Payment initiation
276	Workshop	Add expectedBookingDate field
277	Workshop	Modify the decision table for valuing the payment request depending on the type of the payment
278	GTT	Avoid duplication of UltimateCreditor structure
280	CASA	Implementation of openId Connect 1.0
282	CASA	Set amount type to number
285	WS TPP	Implement RFC7591 for OAUTH2 Technical Setup
286	FIS	Removal of the OPT-OUT option
287	GTT	Add a structured PSU identity
288	ARKEA	Add an ACTC value for transaction status
291	Budget Insight	Higher size limit to the OAUTH2 state parameter
292	Workshop	Align technical Id size to 36 characters
293	SG	allow "NONE" authentication approach for some cancellation usages
294	SG	Precision on the type of cancellation (PSU or PISP asked cancellation)
295	FIME	Data type Inconsistency between bookingDate, dateFrom and dateTo
296	FIME	Wrong cross-references in Word documentation
297	FIME	Precision on content-type for Http-signature
298	BPCE	Precision on no need to check the existence of the PSU-PISP contract

299	CASA	Modify booking date handling in card accounts
300	CDC	Fix the "put /consents" request body cardinality
302	STET	Set amount as mandatory in AmountAndCurrencyExchangeDetails
303	TrueLayer	Provide the Company name for corporate accounts
304	LBP	Precision on the absence of eiDAS certificate for the OAUTH2 Get /authorise request
305	ARKEA	Precision on (request-target) for Http-Signature
306	ARKEA	Precision on the QSEAL certificate format for http Signature
307	ARKEA	Precision on the acceptable protocol for the URL aiming to provide the qSEAL certificate (Http/https)
308	BPCE	Fix the creditor structure in the swagger examples
309	CMCIC	Time-out on before getting the OAUTH2 Authorization Code Token
310	CMCIC	Time-out before posting the confirmation of a payment-request with an OAUTH2 Authorization Code token
311	SWIFT	Simplify Structured Remittance Information
312	SWIFT	Fix the multiplicity of InstructedAmount
313	LINXO	Add new values for PsuStatus
314	Mainsys	Align Resource Id to 36 characters (UUID)
315	CASA	Add new reason codes for payment initiation
316	BNPP	Fix the href URL for HAL links within the documentation examples
318	LINXO	Set the transactionDate as datetime
320	BNPP-Fortis	Add a new payment request status for partially signed request
321	ARKEA	Precision on signed amount for funds-confirmation request
322	SWIFT	Add a new payment/transaction status for cancellation
324	TPP WS	Rename "EMBEDDED" to "EMBEDDED-1-FACTOR"
327	STET	Replace "Co-account Holder" by "Account Co-holder"
328	STET	Document RFC 7592
329	BFCM	Add a new keyId management for http-signature
330	Umanis	Add a precision on the PUT Payment-request when unauthorized modifications are posted
331	ARKEA	Error on 'unitCurrency' Type
332	BNPP Fortis	Add an alternate structured address
333	FIME	Increase href length in hyperlinks
334	ARKEA	typo on OpenId Connect paragraph
335	ARKEA	Missing information using MTLS
337	LINXO	Precision on the use of ResourceIds
340	LINXO	Allow the restitution of a subset of transactions
341	LINXO	At least one date to be provisioned within each transaction
342	LINXO	Precision on transaction status valued to OTHR
350	AFEPAME	Default Transaction history
351	STET	Use of Markdown within the SWAGGER file
352	AFEPAME	Stability of entryReference value within time

353	CASA	Add an text field in addition to the remittance information for transactions provided to the AISP
357	FIME	Clarify that a body is always required for posting a confirmation
