

id	source	résumé
1	BNPParibas/Mercatel	Allow a TPP to suggest a SCA execution or a SCA exemption through the API
93	HSBC	Client Credential OAUTH2 TOKEN for PIISP
99	CASA	Implementation of https://datatracker.ietf.org/doc/draft-ietf-oauth-mtls/
114	ARKEA	How to impose an new SCA to the TPP
148	CASA	Allow the use of the payment-request also for payment on behalf of the ordering party
149	FIS	Avoid repeating Header Info in chapters 5+ (interaction examples)
150	FIS	Fix the absence of PSU-GEO-Location in §3.6
151	BPCE	Fix the mention of PSU context in PIISP use case
152	BPCE	Fix of the diagram of AISP Redirect SCA
153	BPCE	Allow the Title of the API to be edited within each implementation
154	CDC	Swap between "dateFrom" and "dateTo" specifications
155	CNPS	Precision on balances
156	CNPS	The specification leads to think that there can be no exemptions to SCA!
157	CNPS	Precisions on the list of "PSU headers".
158	CNPS	Implementation of access (Read-Only) to the list of trusted beneficiaries
159	CNPS	Payment request with no immediate execution of an instruction
160	CNPS	Recurrent payments handling
161	CNPS	Payment initiation with multiple instructions
164	API EG	Implement mixed consent management model for AISP
165	SG	Clarification on how the payment request resource identifier is provided to the PISP
166	CM-CIC	Clarification about the usage of PAN in a PCI/DSS context
167	CASA/LCL	Incorrect "Authorization" header in the OAUTH2 examples
168	CASA/LCL	Inconsistency POST/GET in the Client Credential OAUTH2 token Request
169	CASA/LCL	set the client_id parameter as mandatory for all OAUTH2 token requests
170	BudgetInsight	Fix the URL in § 3.4.3.2
171	BudgetInsight	Improve the included examples in SWAGGER File
172	BudgetInsight	Incorrect cross-mutual authentication in the call-back management (§4.5.2.1)
173	BudgetInsight	Incorrect example for confirmationresource structure in SWAGGER file
174	BudgetInsight	Suggest a standardisation on how to retrieve the public key for HTTP Signature
175	BPCE	Avoid the ambiguity between the two relevant PSU in § 2.2.5.1
176	FIS	Detail all headers in Word documentation
178	BNPP	Adding an HTTP header for mobile identification
179	CNPS	Forward Information about the beneficiary registered as trusted or not to the PISP
180	CNPS	Forward Information about the availability of funds to the PISP
181	CNPS	Removal of FULL ASPSP (B2) consent model
182	CNPS	Cancellation of payment requests
184	GTM	Removal of transfer-requests resource
185	STET	Add CARD account payment Type

id	source	résumé
187	SG	Lifetime of the "Authorization Code" or "Resource Owner Password" OAUTH2 token for PIISP
188	GTT	Externalize common HTTP return codes
189	BNPP	Add a payload to each HTTP return code
190	CASA	Set [_links] and [resourceId] fields as optional in [AccountResource] structure
191	CDC	Set a Max value for [numberOfTransactions] field
194	GTT	Merge "payment-requests" and "periodic-payment-requests" API entry-points
195	GTT	Use a PUT entry-point in order to implement cancellation of payments
196	LBP/SG	Additional information for international payments
197	CNPS	Add connected PSU's last name et first name
198	CNPS	Allow the PISP to suggest the insertion the beneficiary of the payment within the trusted beneficiaries list
199	GTM	Apply HTTP signature on response sent by ASPSP
200	HSBC	Unclarity about the forwarding of the PSU username on REDIRECT approach
201	HSBC	Suggest a modification of the Authorization Code OAUTH2 grant
202	LUXHUB	Add a precision about the absence ou invalidity of http signature
203	API WORKSHOP	Detail the MTLS mechanism
204	ARKEA	Clarify how to use the data for payment, transfer and standing orders
205	CDC	Add a transactionDate
208	LINXO	Alignment of ASPSP definition on PSD2
209	STET	Clarify the title of § 3.8 "Specific HTTP messages to be used"
211	SWIFT	Add a value date for transactions
212	SWIFT	Make GenericIdentification/Issuer optional
220	SG	Extend the length of the remittance information
